Print Media to Avoid Do not use the following types of paper. Loading paper in the auto sheet feeder is easy, and is convenient if you frequently switch to and print on various sizes or types of paper. Loading paper in the cassette allows you to print without reloading paper for each job. This is useful for printing onto a large volume of paper. To use this feature, you need to configure the printer driver beforehand. Flatten the four corners of the paper before loading it. Load limit mark Do not load beyond this load limit mark. 3 Pinch the paper guide and slide it against the left side of the paper stack. You can use general copy paper or Canon's Super White Paper. You can load up to 150 sheets of plain paper 64 gsm or 17 lb, 13 mm or 0.52 inches in height in the auto sheet feeder. Do not use envelopes with embossed or treated surfaces, a double flap, pressure seals or sticker flaps. See "Using Specialty Media Loading Plain Paper in the Cassette". Ensure that the paper is loadable in the cassette. For detailed information on the specialty media Canon provides for use with its various printers, see "Using Specialty Media Refer to "Printing Media". You can load up to 150 sheets of plain paper 64 gsm or 17 lb, 13 mm or 0.52 inches in height in the cassette. However, do not stack more than 50 sheets in the paper output tray. Prepare the Paper Output Tray. You can also select the paper source with the printer driver. Do not use envelopes with embossed or treated surfaces, a double flap, pressure seals or sticker flaps. This may cause paper discoloration due to natural aging. For a detailed description of the printer driver settings, see "Printing with Windows" on page 20, or "Printing with Macintosh Windows Windows". When the auto sheet feeder lamp is lit, paper is fed from the auto sheet feeder.

When the cassette lamp is lit, paper is fed from the cassette. Create a document or open a file to print. Open the printer properties dialog box. The PIXMA iP6700D Photo Printer produces beautiful, longlasting prints with startling color and detail. View larger. This printer makes it easy to print and share digital photos at home. About the iP6700D The iP6700D is an extremely user friendly, efficient machine designed to meet all your printing needs in one compact, stylish unit. Want to print out photos taken over the weekend, or fill an album with baby pictures right after your child takes his or her first steps. Need a hard copy of directions to a friends house or information from a web page. The single function iP6700D gives you more choices, more features and a better value, no matter what your needs. It also works fast, offering print speeds of 47 seconds for 4 x 6 inch borderless photos and 76 seconds for 8 x 10 inch photos. And the builtin two sided printing feature and second paper tray drastically reduce wait times. In addition, the iP6700D utilizes Canon Fullphotolithography Inkjet Nozzle Engineering FINE technology and the ChromaLife100 ink system to produce high quality, longlasting photos. With smart LED equipped ink tanks and the Canon Advanced Paper Handling System, the iP6700D has the capabilities of a photo kiosk built right in. Easy Operation and Exceptional Resolution The iP6700D features 3,072 precision nozzles that create exceptional resolution of up to 9600 by 2400 color dots per inch dpi. You'll also enjoy amazing, eye-catching detail in every print, thanks to microscopic one picoliter sized ink droplets. Two high intensity photo inks plus four conventional inks equals precise, lifelike color. You get all this with simple, convenient operation. First, the iP6700D gives you the option to preview before you print. This way, you can finetune your images before you commit to printing them out. When you're ready, just connect your PictBridge ready digital camera, DV camcorder, or compatible memory card and print. Its truly that simple.

For added convenience, the iP6700 also lets you print wirelessly right from your infrared enabled mobile camera phone, or a compatible Bluetooth device, using the optional USB Bluetooth adapter. You can do all this quickly and easily thanks to the USB 2.0 interface, which enables the fastest possible image transfers. Canon ChromaLife100 System For Image Permanence The iP6700D uses Canons ChromaLife100 system, including FINE print head technology for vivid photo printing. When using select genuine Canon photo papers and inks, prints can resist fading for up to 100 years when stored in an archival quality photo album. The 100 year lifespan rivals that of many traditional film based photos, long considered by consumers to be the benchmark for image permanence. Prints produced on Canon Photo Paper Pro with ChromaLife100 inks have an up to 10 year gas fastness when exposed to open air. Additionally, ChromaLife100 prints, when created using Canon Photo Paper Pro or Photo Paper Plus Glossy, have up to 30 year lightfastness when displayed under glass. Canon FINE Engineering Launched globally by Canon in 1999, the Canon Fullphotolithography

Inkjet Nozzle Engineering FINE advanced print head technology is one of the keys to the impressive speed and high photo quality in PIXMA photo printers. FINE technology uses a groundbreaking highperformance, multinozzle print engine that ejects consistent and microscopic ink droplets. The results are highresolution photos with great detail and clarity in less time. Light Jr. 5.0 out of 5 stars I have always been amazed at the quality of the photo prints this printer produces and it functions well enough for documents when the need arises. Although Canon did not issue specific drivers for Windows 10 for this model I have had no issues getting it to work in the Windows 10 environment using Windows 8.1 drivers. I have never used off brand ink cartridges, always Canon cli 8s. I also stick with Canon photo paper for photos. I dont know if that contributed to the long life of my first ip6700D, but it almost certainly didnt hurt. I am keeping my fingers crossed that my new printer holds up as well as the first. One can print from most cameras memory sticks directly to either printer I picked Canon over the HP because of higher resolution, higher inkjet cartridge capacity, and Canons built in duplex two sided printing. It was important for me that I can use this printer for more than photos but also for regular printing tasks. Also I plan on purchasing a Canon Camera and my perception is that it would be more compatible with a Canon printer. Make sure you go to a store such as Staples and take a hands on look at whatever printer your looking to purchase. And especially look at the cost of the ink. My parents were thrilled with the new batches of photos coming every week of my then infant daughter. But after a month, I started noticing that the pictures looked a little funny. My daughter always looked a little bit too pink. It wasnt quite so noticeable at first it always appeared like she just had a healthy flush to the skin. But photos of myself and I have an asian complexion looked way too orange. This is even though I was using the more expensive Canon Photo Pro paper.

I started printing more and more photos and noticed that my white couch, my beige chair, my cream colored walls they all appeared pinkish or orangeish in all the photographs. I knew there was a definite problem when I took out the ink cartridge and noticed that the blue ink was about 75% full and the red ink was about 10% full. Unless I was consistently taking pictures of apples or Arizona sunsets, that should not be happening. Since we were still under warranty, we contacted Canon and they informed us that we had to take it to an authorized repair shop. They glanced at the photos and when we suggested that they print one of our photos from the JPEG we had it on a CD for them, they scoffed. Ultimately, Canon sent us another printer and included a return postage label for us to return the defective one. YAY! Unfortunately, using the new printer, we saw the exact SAME problems. I scoured the internet in search of reviews or complaints that other people may have had similar problems. I did find two people who complained of the same, but thats it. At least one other person on this product review page mentioned that Canon had red cast problems with their ip6600 photo printer. Im so disappointed that with the many many positive reviews of this product that I seemed to have gotten two duds. I wonder if anyone else may have had the same problems after extended use. Will not be buying another Canon for awhile. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
